PROFESSIONAL SUMMARY

Experienced Frontend Engineer specializing in React, Next.js, and modern web development. Skilled in building high-performance, scalable, and user-friendly applications with a strong focus on UI/UX, design systems, and performance optimization. Proficient in JavaScript, TypeScript, CSS frameworks, and Node.js. Passionate about technical leadership, mentoring, and creating seamless digital experiences.

SKILLS

- React.js
- Next.js
- JavaScript
- TypeScript
- HTML5 & CSS
- Node.js

EXPERIENCE

Frontend Team Lead
Alleysa

May 2024 – Present
Vancouver, British Columbia

- I joined Alleysa as a Frontend Developer and later became the Frontend Team Lead, leading the development of a large-scale, feature-rich travel platform similar to Airbnb and Turo
- Led the frontend development of Alleysa's main platform, an all-in-one solution for travelers
- Developed a custom calendar and date picker from scratch, ensuring flexibility and seamless integration across the platform
- Built a powerful search system, synchronizing data across the entire website for accurate and fast results
- Worked with the latest version of Next.js, developing the main website, admin panel, guest & host dashboards, and other key features
- Optimized performance, scalability, and maintainability for a seamless user experience
- Collaborated closely with backend and design teams, ensuring a smooth development process and high-quality product delivery

Technical Team Lead
Soshyant Financial Tech Company

Nov 2023 – May 2024
Tehran

- I joined Soshyant as a Technical Team Lead, focusing on improving the main design system and leading the team in optimizing performance and feature development
- Enhanced the main design system, Negar, ensuring better performance, scalability, and maintainability
- Led the team in tokenizing the design system, keeping it synchronized with Figma designs for seamless collaboration
- Worked on performance optimization, identifying and fixing critical performance bottlenecks
- Developed highly requested features, improving developer experience and UI consistency across projects

Frontend Mentor & Developer
Alibaba Travels Co.

Oct 2022 – Nov 2023
Tehran

- Company Overview: the largest and most prestigious travel booking platform in Iran
- I joined Alibaba, the largest and most prestigious travel booking platform in Iran, as a Frontend Mentor and Frontend Developer in the Hotel Team

- Helped run Alibaba's first Frontend Academy, working alongside other frontend developers to mentor and train new talents
- Conducted interviews and reviewed applications for around 20 candidates, selecting approximately 12 to join the academy
- Collaborated with senior developers to structure training sessions, covering modern frontend technologies and best practices
- Guided trainees toward junior frontend roles, with most of them successfully joining Alibaba's product teams
- Refactored the existing codebase, improving readability, performance, and maintainability
- Worked on the hotel management system's admin panel, implementing key features using Vue.js
- Optimized frontend performance, enhancing the overall user experience and system efficiency
- The largest and most prestigious travel booking platform in Iran

Frontend Mentor   May 2020 – Feb 2023
MAPSA HR & Training   Tehran

- I joined MAPSA HR as a Frontend Mentor, leading three full frontend bootcamps to train aspiring developers from scratch
- Ran 3 intensive frontend bootcamps, mentoring students from beginner to job-ready level
- Helped ~30 students land jobs by providing hands-on training, real-world projects, and career guidance
- Taught core frontend technologies, including HTML, CSS, JavaScript, React, and modern development practices
- Provided one-on-one mentorship, code reviews, and industry insights to help students succeed

Technical Team Lead   Aug 2020 – Nov 2022
Kian Digital   Tehran

- Company Overview: one of the largest stock market brokerage firms in Iran
- I joined Kian Digital, one of the largest stock market brokerage firms in Iran, as a Frontend Developer to work on their CRM system, SivaCRM
- Over time, I expanded my role significantly, building and leading a tech team while transitioning into a full-stack development role
- One of my biggest achievements was leading the development of a cutting-edge news platform with real-time capabilities, including live streaming (like YouTube Live), real-time chat for live videos, and dynamic content management & publishing
- I led a team of 4 frontend developers while also being the sole backend developer for this project, architecting the backend using NestJS and MySQL and the frontend using Next.js
- As the platform evolved, it transformed into a powerful CMS, which we used to rebuild multiple company websites, making content management more efficient and scalable
- One of the largest stock market brokerage firms in Iran

Frontend Developer   Nov 2019 – Jul 2020
Kian Digital   Tehran

- Key Achievements in Kian Digital (SivaCRM) team:
- Refactored the existing codebase for better maintainability and scalability

- Migrated the project from JavaScript to TypeScript, improving code quality and developer productivity
- Optimized performance and UI components, enhancing user experience

Frontend Developer
Mofid Securities

Aug 2018 – Nov 2019
Tehran

- I joined Mofid Securities as a Frontend Developer, working on the company's most critical ERP system
- My primary role was to rewrite the existing ERP application using React, modernizing the platform for better performance, maintainability, and user experience
- During my time there, I also expanded my knowledge in backend development with Node.js, contributing to API development and backend optimizations
- This experience helped me gain a deeper understanding of full-stack development, improving my ability to build scalable and efficient applications

Web Developer
Ideh Pardazan

Feb 2016 – Aug 2018
Tehran

- I started my software development journey at Ideh Pardazan as a WordPress Developer, tasked with rebuilding the company's main websites from Joomla to WordPress
- I worked closely with a UI/UX designer to modernize the designs and improve user experience, ensuring better performance and scalability
- As I gained experience, I expanded my skills in HTML, CSS, JavaScript, PHP, Laravel, and Vue.js, allowing me to take on more complex web development tasks
- My contributions led to my promotion as a Team Lead, where I managed a team responsible for delivering and maintaining company websites

🎓 EDUCATION

Bachelor's degree in Graphic Design
Farhang & Honar

Jan 2011
